

PRO-FOCUS CONTACT CLEANER

Pro-Focus Contact Cleaner is a specially formulated cleaner for electrical and electronic components such as micro-switches, relays, connectors, plug connections, switchgear, potentiometers and audio parts. By applying **Pro-Focus Contact Cleaner**, the contacts are cleaned, moisture is expelled and the contact resistance of the connection is restored. Dissolves oil and resin and leaves no residue after drying.

- Cleans and degreases connectors and connections.
- Restores contact resistances.
- Evaporates quickly and leaves no residue.
- Displaces moisture and removes oil, resin, dirt and dust deposits.
- Test compatibility on the material used before use.

User instructions:

Shake before use. Apply to parts requiring lubrication or protection. Before mounting, allow the volatile components to evaporate, preferably 5 minutes. Remove excess product with a cloth.
